

MOODMOON White
SEBASTIAN HEPTING 2021

MOODMOON White is a bright alternative to the coloured MOODMOON, emitting a pure white light with high colour rendering. The poetic light effect of the luminaire by Sebastian Hepting is created by the unique structure of the Japanese paper, which is penetrated by bright, warm white LEDs as a rear projection. The shape of MOODMOON White - round or square - is reduced and restrained so that the extraordinary paper unfolds its effect more effectively and allows reflection on the essentials. MOODMOON White can be mounted as a wall or ceiling luminaire. As it is only 5 cm high, it is particularly suitable for rooms with low ceilings to flood them with light.

Technical data

approx. 4000lm, 2800K, CRI 95, EEC F (A-G). Infinitely dimmable via radio remote control.

More info

Easy to install as it is only attached to a nail. Supplied with a 350 cm long plug cable. Several luminaires can be coupled and then controlled synchronously via a remote control that can be attached to the wall with a magnetic holder.
