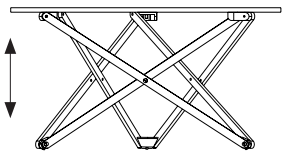
Natural finish

Black finish



CE

Conceived by British designer Heritage, the most awarded designer by the British Design Council, and Webb (also British), founder of a studio specialised in home and office products. Subeybaja is a multipurpose round table with a wooden top and articulated legs that can be adjusted to seven heights. The height is adjusted by means of a smart mechanism, the lever of which is shown by a white point on the table top. This versatile table is an excellent option for small apartments with limited space. The best legacy from the catalogue by Disform, a Barcelona editing company that closed its doors in 1998.
