# THE ART OF LIGHTING DESIGN

By Deyan Sudjic

Ingo Maurer changed the way that we see light. He was a designer who worked with technology and used craft skills to produce some of the most inventive and original lights of our times. They are playful, delicate and full of the kind of emotional expression that makes them much more than simple utilitarian objects.

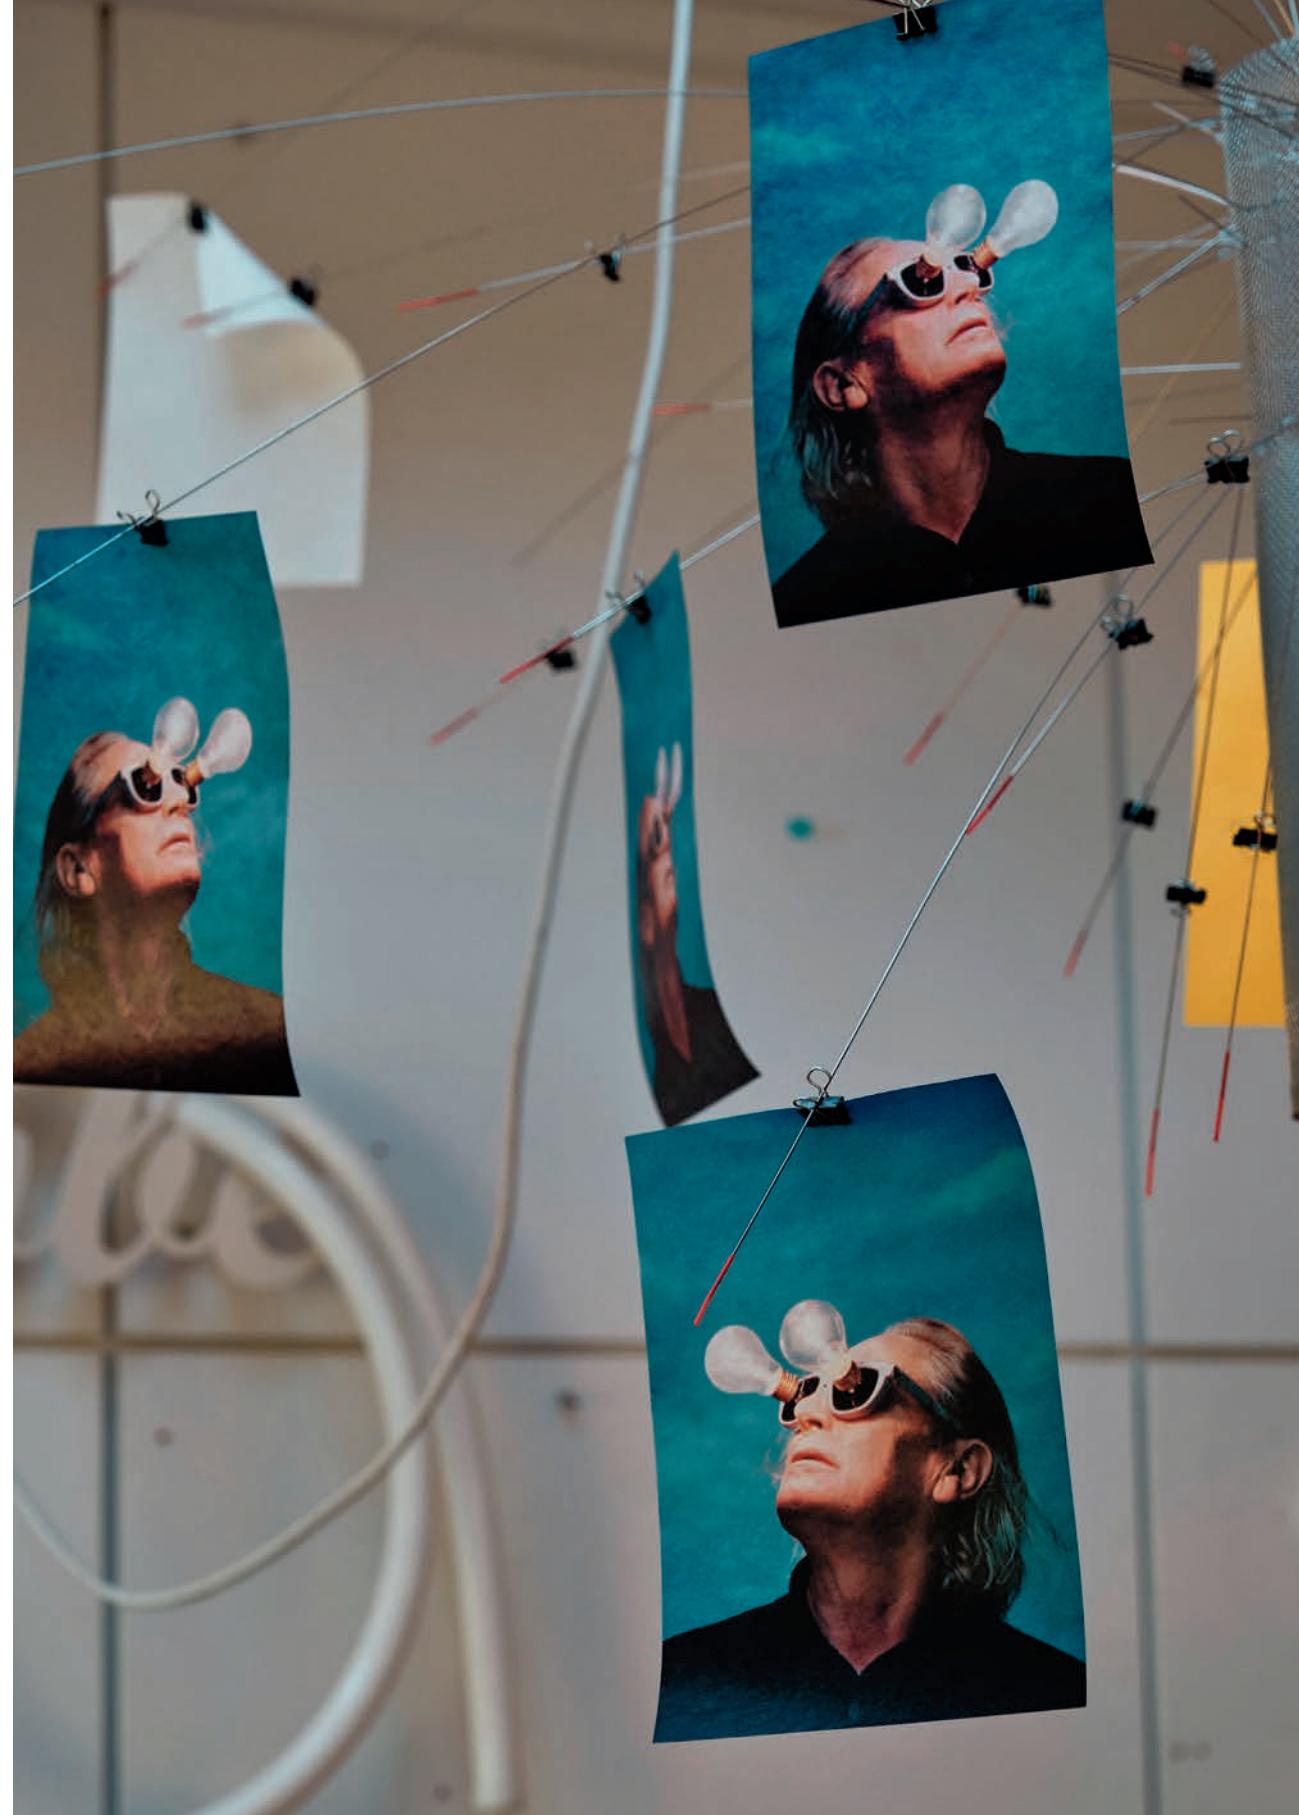

At the same time, Ingo built a company that was partly the studio of an artist, part workshop and part research laboratory to make his designs. It is still flourishing today as part of the Foscarini group. Inspired by the work of the founder, the design team in Munich has maintained the company's reputation for creative innovation with a range of new products. It is unique in the world of lighting manufacturing, closer to a couture atelier than a factory production line. Ingo understood the sense of personal interaction that we can have with domestic lights. It is an interaction that comes from the impact that the quality of light has on our emotional mood, and the reassurance that comes from a tactile switch that puts us in command of it.

Born in Germany in 1932, he began his career working as a graphic designer in the USA, before going home to Munich and opening his workshop there. When Ingo started designing, electric light was still less than a century old. Unlike the chair, which mankind has been making for thousands of years, the taxonomy of lighting: ceiling lamp, floor lamp, desk light and so on, had only recently taken shape.

Joseph Swan and Thomas Edison had filed their respective patents for filament light bulbs in vacuum filled glass tubes at the end of the 1870s. Early electric light fittings were patterned on candles and oil or gas lamps, until under the influence of the Bauhaus they took on a more simplified form.

Ingo Maurer began his career as a lighting designer in 1966 with *Bulb*, his tribute to Edison, a surrealistic visual pun which put a light bulb inside a giant bulb-shaped glass enclosure, an idea that San Francisco's Museum of Modern Art has compared to a Claes Oldenburg sculpture. It was designed at a time when the light fitting was still seen as either frankly functional, or else cosmetically decorative. *Bulb* was a much more subversive idea, it suggested that wit could be part of the equation.

Ingo Maurer explored lighting free from the weight of precedent. Since there was no 'right' way to make a light, Ingo could invent his own archetypes, of which perhaps the most significant is *YaYa Ho* from 1984. Inspired by what he saw in a street bar in Haiti where electricity was being siphoned off the power grid illegally but ingeniously, *YaYa Ho* was a completely original way of lighting a room. It uses an array of dangling mirrors, shades and lamps hanging from a pair of current carrying wires.

Ingo Maurer lights are playful, delicate and full of the kind of emotional expression that makes them much more than simple utilitarian objects.

It is a non-system system, a kit of parts with no finite form, that requires a creative input from the user. It demands more commitment than a simple purchase. Ingo was neither a modernist nor a post-modernist. The imagery of *YaYa Ho* is tribal meets high tech, with allowances for the possibility of imperfection of handwork and the patina that goes with it.

Ingo Maurer explored the nature of artificial light against the background of a continually evolving technology which gathered speed during the course of his career. Ingo was always a pioneer user of new light sources. He worked with dichroic bulbs, and later with LEDs, using them to recreate in a contemporary way some of the qualities of candlelight.

But he remained fascinated by Edison's invention of the tungsten filament incandescent lamp. A light bulb is a genuine icon, its instantly recognisable shape is universally understood as signifying light, and as a figure of speech is used to suggest enlightenment. The *Lucellino*, one of several Ingo Maurer designs in the collection of MoMA in New York, transforms what looks like a standard bulb with the addition of a tiny pair of feathered wings. The end of tungsten filament bulbs means that the light source inside the specially made bulb is now an ambient LED.

When the tungsten bulb was abolished in the European Union, and then subsequently in the USA, *Wo Bist Du Edison*, another Ingo Maurer tribute to Thomas Edison, was a ceiling light that involved the holographic image of a light bulb projected on an acrylic shade, with a socket shaped like Edison's profile.

Ingo Maurer's work was always unpredictable, always unexpected, always impossible to typecast. He had the generosity to be continually looking for designers to collaborate with.

Ingo Maurer's products depend on a deft assembly of special components, offering a kind of updated craftsmanship. He taught his team to work with ready-made components. *Porca Miseria* is a chandelier fabricated from a cloud of smashed dinner plates and cutlery caught as if in the middle of an explosion. He made another light from a cluster of Campari bottles. At other times he used Japanese paper to create translucent shades, and printed circuit boards as the base of a digital candle.

The essence of the magic of his lights is in the way they bring to life the spaces in which they sit, rather than attempt to overwhelm them. Ingo died in 2019. He left behind a rich legacy of designs both realised that continued to be made and unrealised that can be put back into production, and a studio that continues in his creative path.

#### *Deyan Sudjic*

Deyan Sudjic is a critic, curator and writer. He is the editor of *Anima*, and a former editor of *Domus*. He was the director of the Design Museum in London from 2006 to 2020, and director of the Venice Architecture Biennale in 2002. He writes for the *Financial Times* and the *Guardian*, and is the author of several books on design, architecture and contemporary culture.

The essence of the magic is in the way they bring to life the spaces in which they sit, rather than attempt to overwhelm them.

YEAR 1982  
MATERIAL Porcelain, plastic, brass  
COLOR White, red and black  
LIGHT SOURCES E27

Suitable for EEC A-G

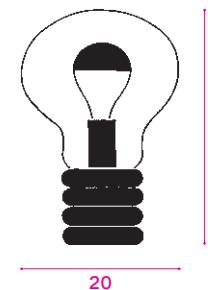

## Bulb

DESIGNER Ingo Maurer  
YEAR 1966  
MATERIAL Copper, glass  
COLOR Chrome  
LIGHT SOURCES E27 Light bulb included

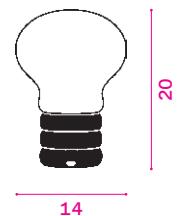

## Bulb Brass

DESIGNER Ingo Maurer  
YEAR 2021  
MATERIAL Brass, glass  
COLOR Brass  
LIGHT SOURCES E27 Light bulb included

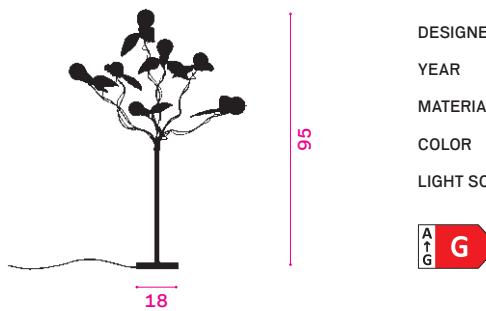

## b.bulb

DESIGNER Ingo Maurer Team  
YEAR 2020  
MATERIAL Aluminum, glass  
COLOR Chrome  
LIGHT SOURCES LED integrated

## Birdies Busch

DESIGNER Ingo Maurer & Team  
YEAR 2010 / 2017  
MATERIAL Goose feathers, copper, steel  
COLOR Silver  
LIGHT SOURCES E27 Light bulbs included

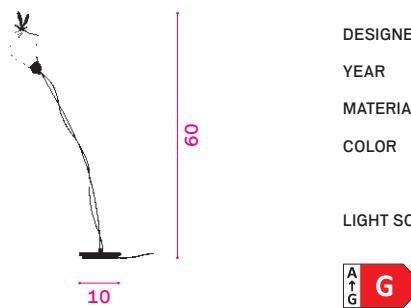

## Campari Bar

DESIGNER Raffaele Celentano  
YEAR 2013  
MATERIAL Melamine, plastic, brass, glass  
COLOR Black and red  
LIGHT SOURCES E27

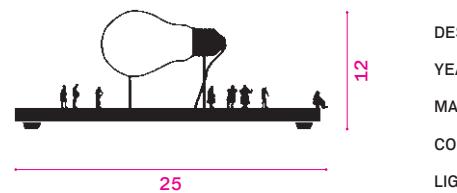

Suitable for EEC A-G

## I Ricchi Poveri Bzzzz

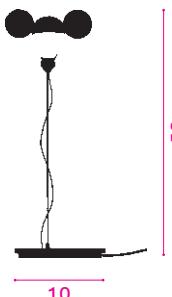

DESIGNER Ingo Maurer  
YEAR 2014 / 2022  
MATERIAL Steel, brass  
COLOR Dragonfly red, green, blue, base anthracite  
LIGHT SOURCES E27 Light bulb included

## I Ricchi Poveri Monument for a Bulb

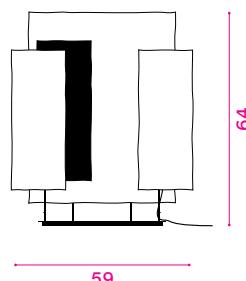

DESIGNER Ingo Maurer  
YEAR 2014 / 2022  
MATERIAL Bright steel, nickel silver  
COLOR Brass, base silver  
LIGHT SOURCES E27 Light bulb included

## I Ricchi Poveri Toto

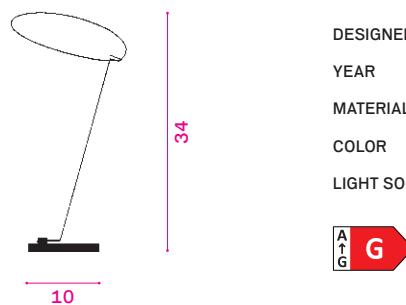

DESIGNER Ingo Maurer  
YEAR 2014 / 2022  
MATERIAL Steel, brass  
COLOR Cap black, white, red, brass, base anthracite  
LIGHT SOURCES E27 Light bulb included

## Kamishibai

DESIGNER Ingo Maurer Team  
YEAR 2023  
MATERIAL Paper, aluminium, steel, plastic  
COLOR Silver, white, grey and black  
LIGHT SOURCES LED integrated

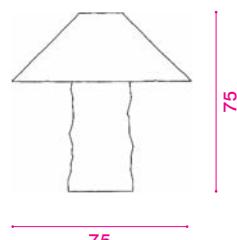

## Koyoo

DESIGNER Axel Schmid  
YEAR 2018  
MATERIAL Aluminum, paper  
COLOR Black  
LIGHT SOURCES LED integrated

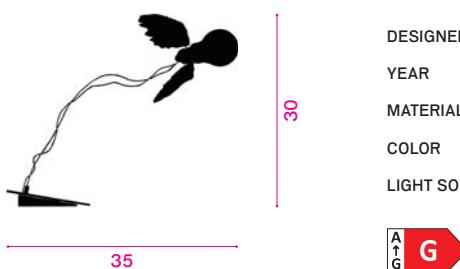

## Lampampe

DESIGNER Ingo Maurer  
YEAR 1980  
MATERIAL Paper, steel  
COLOR White (natural)  
LIGHT SOURCES E27

Suitable for EEC A-G

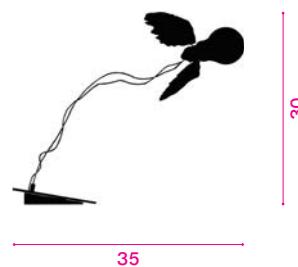

## Lucellino Tisch

DESIGNER Ingo Maurer  
YEAR 1992 / 2022  
MATERIAL Goose feathers, steel, plastic  
COLOR Brass and white  
LIGHT SOURCES E27 Light bulb included

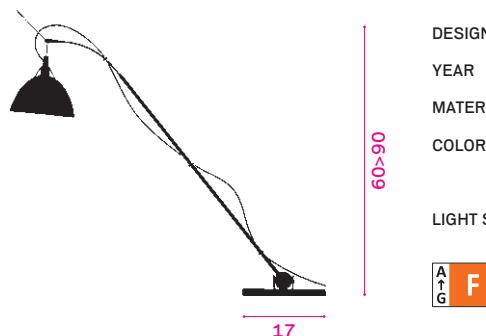

## Lucellino Touch

DESIGNER Ingo Maurer  
YEAR 1992 / 2023  
MATERIAL Goose feathers, steel, plastic  
COLOR Brass and white  
LIGHT SOURCES E27 Light bulb included

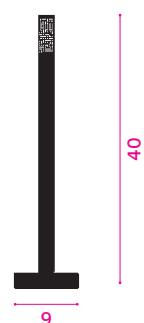

## Max. Kugler

DESIGNER Ingo Maurer & Team  
YEAR 2001 / 2015  
MATERIAL Steel, aluminum  
COLOR Reflector, base chrome, reflector, base black  
LIGHT SOURCES LED integrated

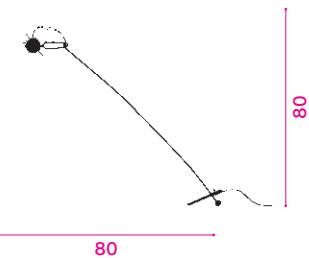

## My New Flame

DESIGNER Moritz Waldemeyer, Ingo Maurer & Team  
YEAR 2012  
MATERIAL Epoxy, stainless steel  
COLOR Candle element black, white, red, base black and chrome  
LIGHT SOURCES LED integrated

## Mozzkito

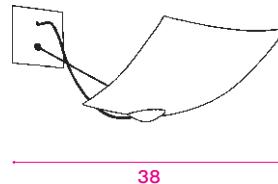

DESIGNER Ingo Maurer  
YEAR 1996  
MATERIAL Steel, plastic, silver  
COLOR Silver  
LIGHT SOURCES GU5,3

Suitable for EEC A-G

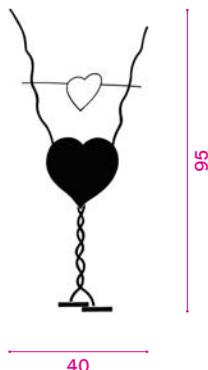

## WALL

18 × 18

DESIGNER Ingo Maurer & Team  
YEAR 2015  
MATERIAL Aluminum, steel  
COLOR White  
LIGHT SOURCES LED integrated

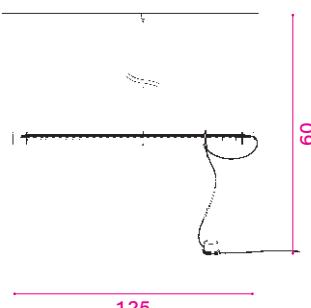

## One From The Heart

DESIGNER Ingo Maurer  
YEAR 1989  
MATERIAL Steel, copper, plastic, glass  
COLOR Red and blue, base silver  
LIGHT SOURCES LED integrated

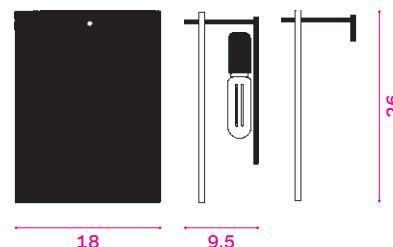

## Tubular Balance

DESIGNER Sebastian Hepting  
YEAR 2021  
MATERIAL Glass, steel, aluminum  
COLOR LED unit and cable red,  
LED unit and cable white  
LIGHT SOURCES LED integrated

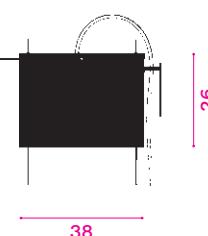

## 24 Karat Blau Flat

DESIGNER Axel Schmid  
YEAR 2021  
MATERIAL Gold leaf, plastic, steel  
COLOR Red  
LIGHT SOURCES E14

Suitable for EEC A-G

## 24 Karat Blau W

DESIGNER Axel Schmid  
YEAR 2017  
MATERIAL Gold leaf, plastic, steel  
COLOR Red  
LIGHT SOURCES E27

Suitable for EEC A-G

## Canned Light

DESIGNER Christoph Matthias, Hagen Sczech  
YEAR 2003  
MATERIAL Tinplate, aluminum, plastic  
COLOR Red and white  
LIGHT SOURCES GU10, Light bulb included (only 230V)

## Holonzki

DESIGNER Eckard Knuth, Ingo Maurer  
YEAR 2000  
MATERIAL Glass, steel  
COLOR black  
LIGHT SOURCES GU4, Light bulb included

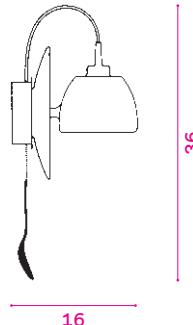

## Delight

DESIGNER Frans van Nieuwenborg, Martijn Wegman  
YEAR 1980  
MATERIAL Glass fabric, plastic  
COLOR White  
LIGHT SOURCES E27

Suitable for EEC A-G

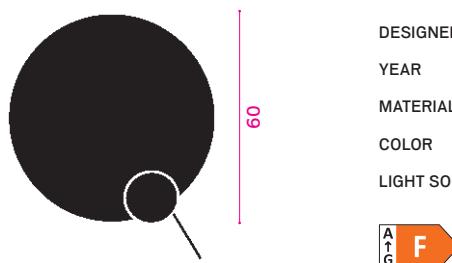

## Light au Lait

DESIGNER Fabien Dumas, Ingo Maurer & Team  
YEAR 2004  
MATERIAL Stoneware, silicone, stainless steel  
COLOR White  
LIGHT SOURCES G9

Suitable for EEC A-G

## Eclipse Ellipse

DESIGNER Ingo Maurer & Team  
YEAR 2017  
MATERIAL Aluminum, steel  
COLOR White  
LIGHT SOURCES LED integrated

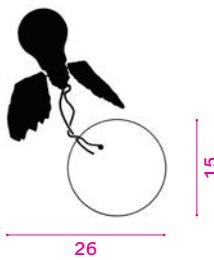

## Lucellino Doppio

DESIGNER Ingo Maurer  
YEAR 2018 / 2022  
MATERIAL Goose feathers, plastic, brass  
COLOR White  
LIGHT SOURCES E27, Light bulbs included

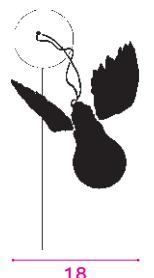

## Lucellino NT

DESIGNER Ingo Maurer  
YEAR 1992 / 2022  
MATERIAL Goose feathers, plastic, brass  
COLOR White  
LIGHT SOURCES E27, Light bulb included

## Lucellino Wall

DESIGNER Ingo Maurer  
YEAR 1992 / 2022  
MATERIAL Goose feathers, plastic, brass  
COLOR White  
LIGHT SOURCES E27, Light bulb included

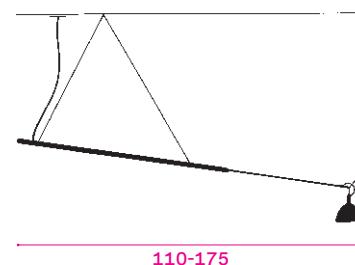

## Luzy On The Wall

DESIGNER Ingo Maurer & Team  
YEAR 2018  
MATERIAL Nitrile (rubber), brass, plastic  
COLOR Blue  
LIGHT SOURCES E27, Light bulbs included

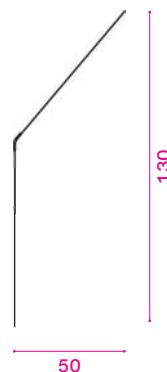

## Max. Mover

DESIGNER Ingo Maurer  
YEAR 2000 / 2017  
MATERIAL Steel, plastic, aluminum  
COLOR Black and chrome  
LIGHT SOURCES LED integrated

## Measure Light

DESIGNER Josua Roters  
YEAR 2023  
MATERIAL Steel, plastic  
COLOR White and transparent  
LIGHT SOURCES LED integrated

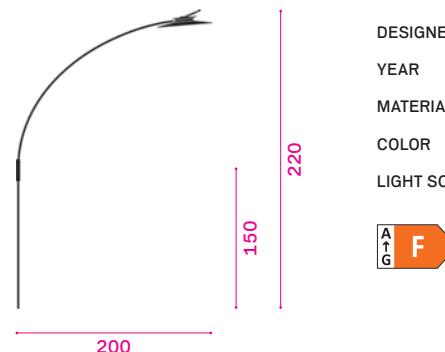

## Ms. Bowjangles Wall

# COMIC EXPLOSION 2010

A burst of light caught in mid-air: sharp, fragmented forms radiate brightness and shadow, animating the room with raw energy. Downward and upward glow combine with luminous arrows to create layers of contrast, so the atmosphere is never static but charged with movement. More than a luminaire, it is a sculptural event — bold, playful, impossible to ignore. Especially powerful in cultural venues, statement lobbies or hospitality settings that thrive on identity, it transforms space into a scene of impact and surprise.

Calibrate the drama

Special sizes developed to your dimensions—  
from intimate to monumental.

# FLATTERBY 2016

Suspended in mid-flight, delicate wings circle a glowing source, scattering reflections and soft shadows that set the room gently in motion. The installation adds lightness and poetry to architecture, softening strict geometries with a sense of wonder. Each piece is numbered and crafted as a collector's object, ensuring rarity and distinction.

## Curate the swarm

Different insects and colour variations allow alignment with thematic concepts, turning every edition into a personal signature within the project.

**Bulb Gigante.**  
A special design of the Flatterby, in a custom-made, even larger  
version for an exclusive wine hotel in Tsinandali, Georgia.

# FLYING DISC 2016

A disc of light that seems to float beneath the ceiling, tethered only by fine wires and animated by geometry. The LED-ring breathes indirect illumination through the white diffuser, bending shadow and glow into a soft choreography—light that shapes without demanding. What feels weightless also demands precision: the angle of the ring, the drop of the stem, the interplay between disc and shadow define its presence. It's a statement piece for spaces that unfold in volume—soaring foyers, creative galleries or elevated dining rooms—where orientation and atmosphere are inseparable.

Tailored dimensions, tuned to architecture

With custom colours and proportions available, it can shift from subtle grace to bold form depending on what the space needs.

# I RICCHI POVERI FIVE BUTTERFLIES 2014

Five fragile wings orbit a glowing filament, as if light itself had drawn them into mid-flight. The scene feels tender and surreal: illumination becomes poetry, geometry dissolves into softness, and the atmosphere gains an intimacy no ordinary fixture could create. A light object and collector's treasure. Most at home in lounges, private salons or reading corners — settings where detail and atmosphere matter — it lends a quiet, poetic accent.

## Compose the flight

On request, variations with different insects or colours align the gesture with concept and palette, making each piece a unique signature within architecture.

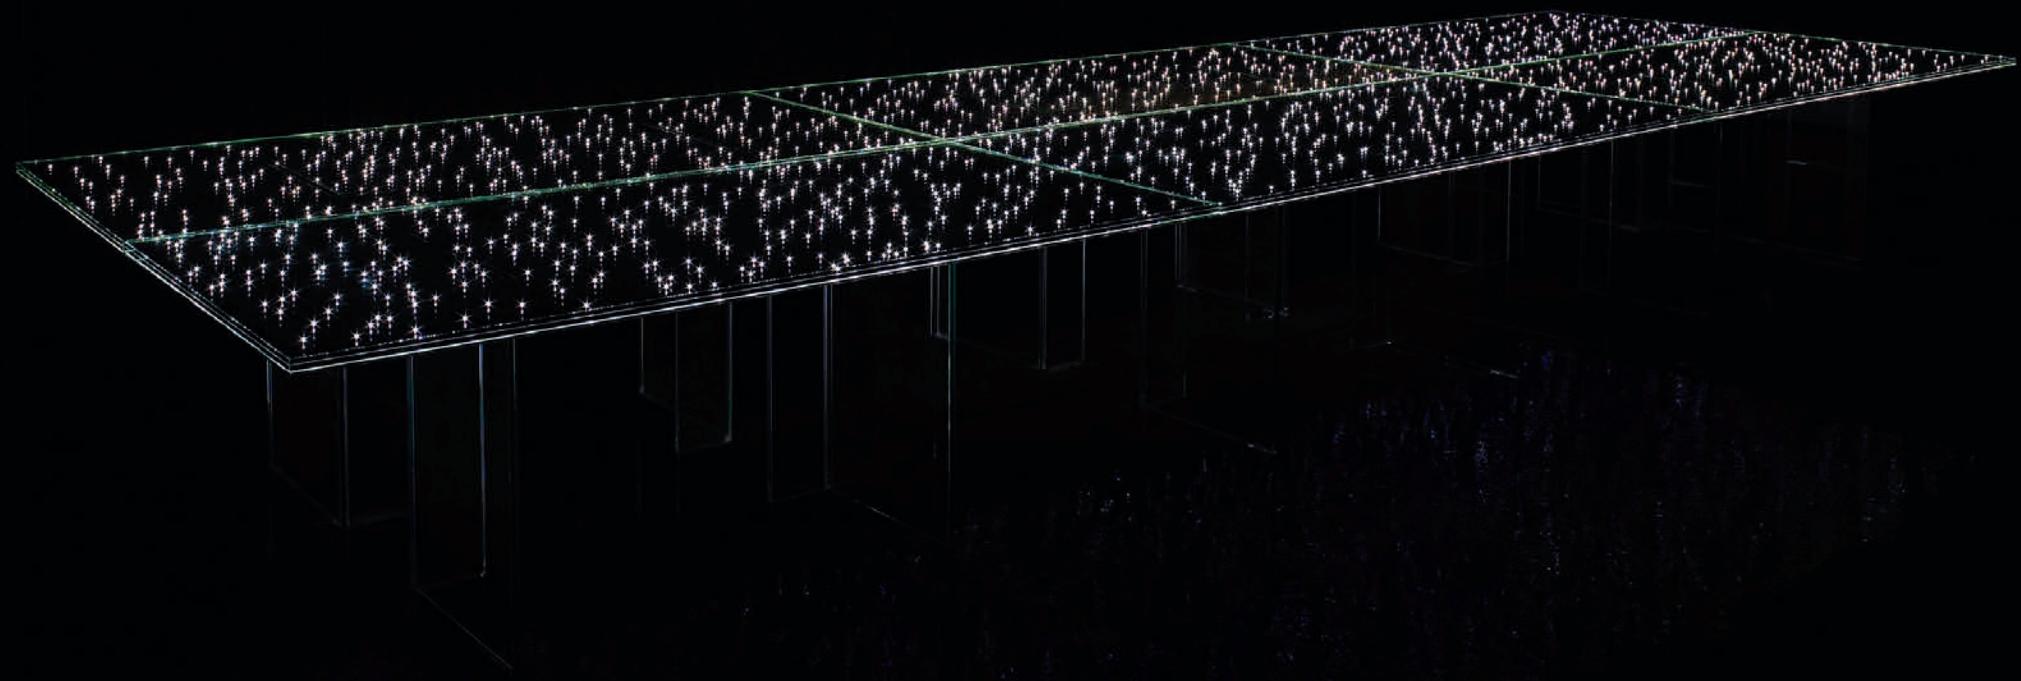

# LED BENCH & TABLE 2003

Light inhabits the furniture, turning benches and tables into radiant surfaces that seem to glow from within. They bring presence and atmosphere into foyers, lounges or intimate interiors, transforming the everyday act of gathering into an encounter with light. Each piece is realised as a unique work — available in different measures, colours, and with the table supported either by glass or metal. This freedom allows the objects to resonate with their surroundings, whether as subtle complement or striking centrepiece. Most at home in reception areas, creative workspaces or private dining rooms, they become luminous landmarks at the scale of human touch.

Led Bench 2003

# LUCE VOLANTE 2012/2018

Suspended as if by whisper, this piece floats like fabric releasing light. A generous downlight meets a halo above, the warm glow shaped by dim-to-warm LEDs that softly shift from candle-warm tones to more radiant warmth, all framed by glass-fiber surfaces and sleek aluminium edges. It softens ceilings, defines circulation, and creates calm without sacrifice — the light becomes part of the architecture, not just its ornament. Best placed where horizontal surfaces need clarity and calm — dining tables, counters, or meeting zones — it offers orientation and atmosphere in balance.

Colour it to context

Available in matt white or matt red, with custom colours possible, so the piece can blend into the palette or draw the eye as a singular accent.

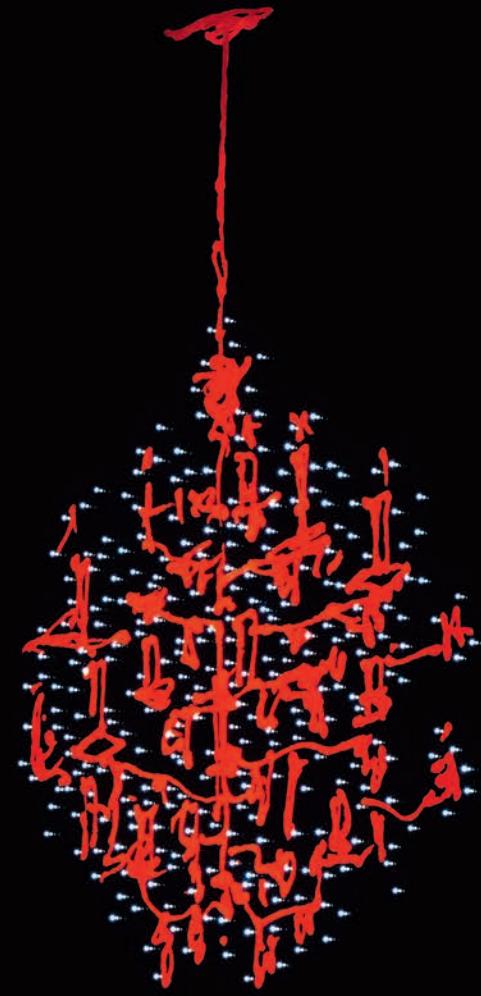

# LÜSTER 2003

A floating chandelier in the truest sense, Lüster suspends itself with invisible cables and radiates soft, dual-sided light from 287 built-in LEDs, sculpting both volume and void. The glass is printed (red or black), with no visible wiring or boards—light appears to be the form itself. Its glow diffuses gently, animating ceilings and casting subtle ambient light downward and outward, so that large rooms feel warm and enveloping, while intimate spaces gain depth and elegance. In application, Lüster serves both as a centerpiece and as ambient enhancer — ideal above long dining tables, in grand foyers, or any high ceiling where formal drama and sculptural subtlety are desired. With custom measures and colour variants, it can be scaled and tuned to match ceiling height, room proportions, or specific design palettes.

# OH MAN IT'S A RAY! 2009

Oh Man, It's a Ray! floats between chandelier and mobile, its wooden arms and glowing bulbs forming a radiant constellation. The layered light animates ceilings and creates shifting patterns of brightness and shadow, so that the object never feels static but alive. More than illumination, it introduces movement and warmth, softening the monumentality of large interiors. Particularly suited for cultural venues, creative workspaces or dining areas where a sense of play and openness is desired, it becomes a luminous centrepiece with a distinctly human touch.

The right hanger for every size

Customisable in form and available in different measures, it adapts effortlessly to diverse proportions and design concepts.

OH MAN

OH MAN, IT'S A RAY!

OH MAN, IT'S A RAY!

YI

OH MAN, IT'S A RAY!

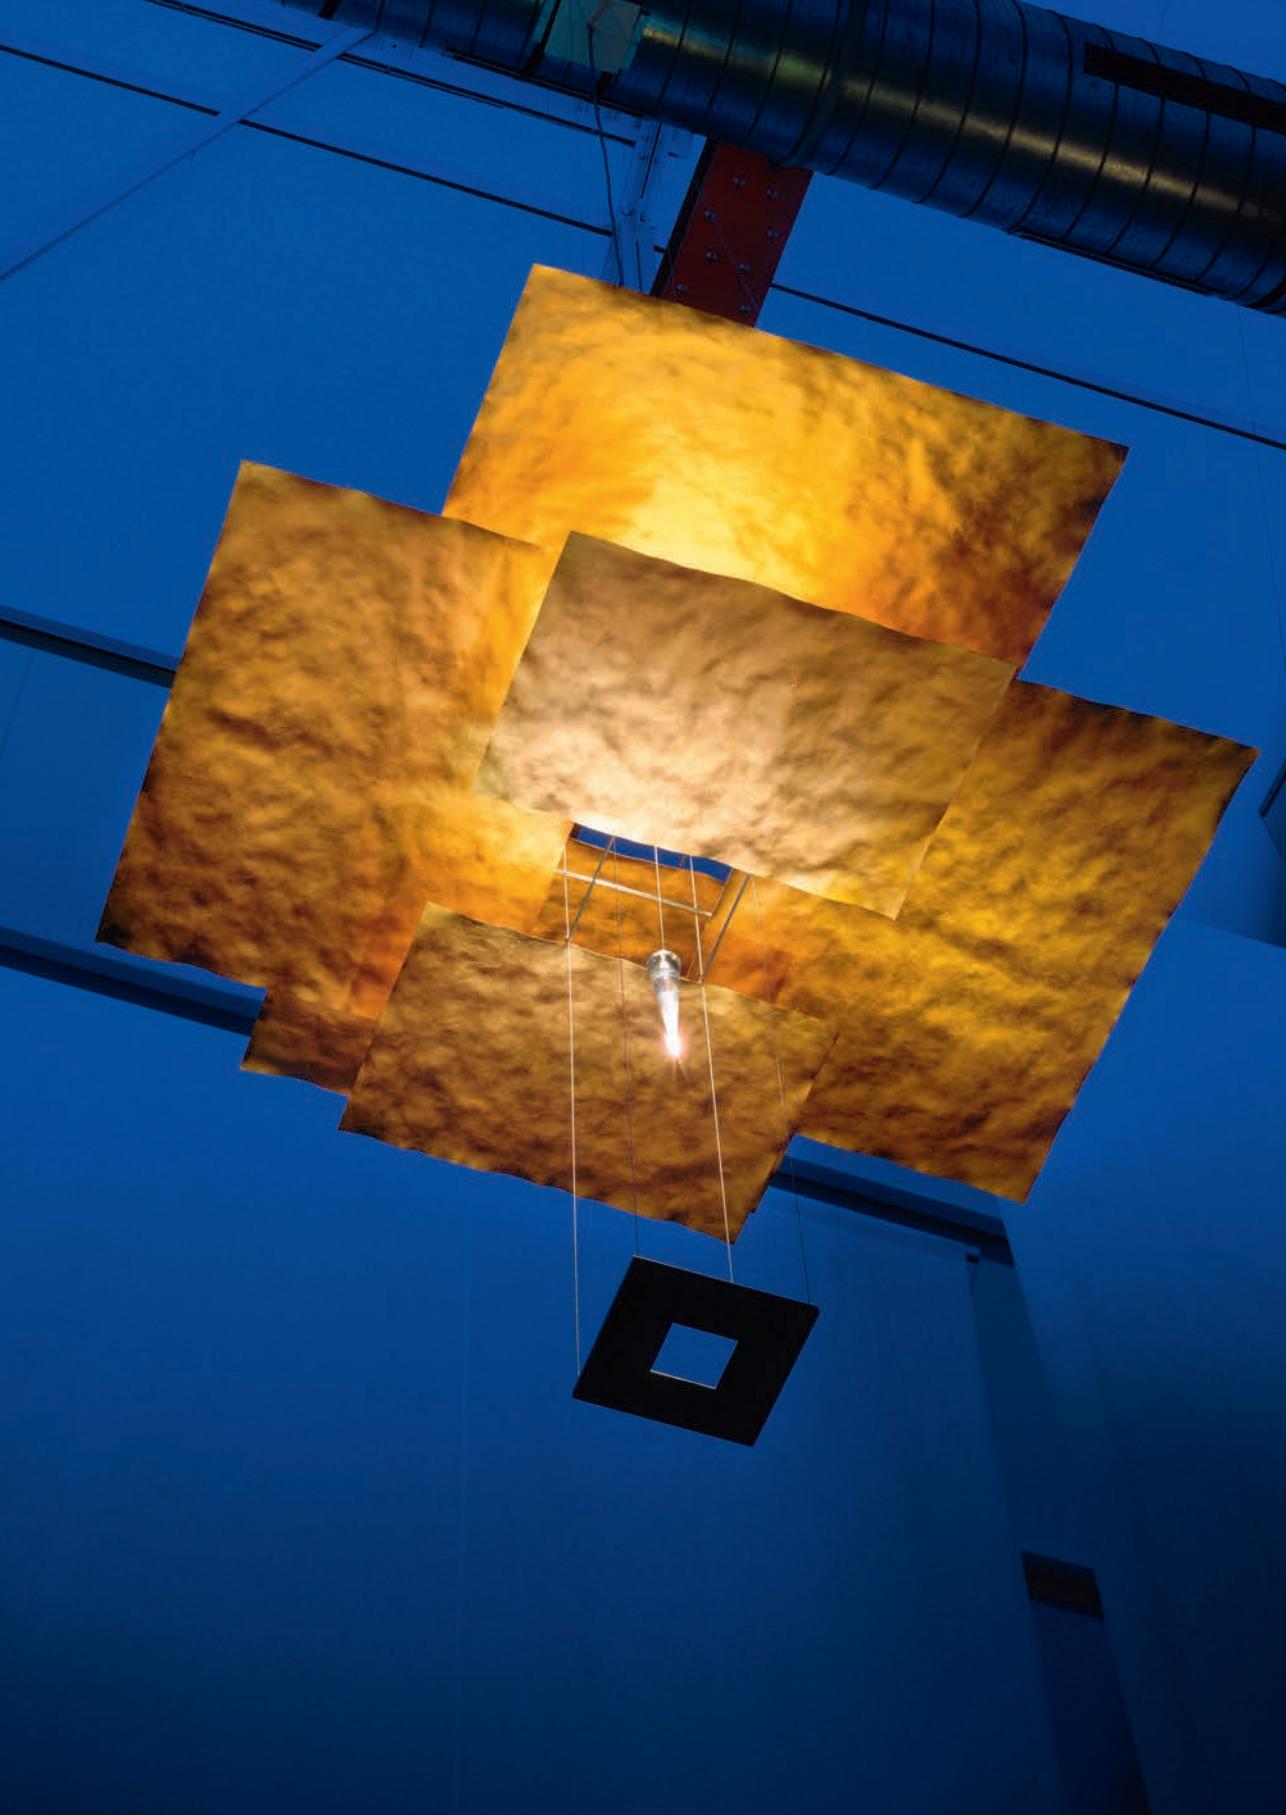

OH

# OH MEI MA 1993

Like a sail caught in an invisible wind, broad golden planes float beneath the ceiling and turn light into pure theatre. Shadows and reflections shift across their surfaces, so the atmosphere is never static but alive with gentle radiance. It brings scale and drama to interiors while remaining serene and weightless, a luminous sculpture that crowns the space. Perfect for settings where light is expected to astonish as much as it illuminates, it transforms architecture into a stage for presence and emotion.

No edits. No options. Pure icon

Offered only in its original composition, it retains its unique power exactly as conceived.

# OH MEI MA KABIR 1993

An expansion of the poetic gesture, the sails unfold here in monumental scale. Where the smaller version conveys intimacy and calm, this interpretation transforms high interiors with grandeur and presence. Layers of golden planes diffuse light into warm reflections and soft shadows, so the atmosphere remains weightless even at dramatic size. More than illumination, it crowns lobbies, halls or cultural venues as a luminous architecture in its own right.

Untouched. Just presence

Offered only in its original composition.

# PIERRE OU PAUL 1996

A sculptural dome of light, suspended with counterweights, that transforms ceiling into canvas and air into volume. Light glows from the underside with warm 2700K LEDs, while the inner surface—gold, platinum or matte lacquer—adds subtle radiance. The interplay of glow and shadow emphasizes the dome's curved clarity, guiding orientation, softening contours, and defining space with both presence and generosity. Ideal for expansive interiors where architecture meets ceremony—grand foyers, meeting halls or pooled dining zones—this piece frames the volumes around it and draws eyes upward in single gesture.

**Scales shift, presence stays**

Available in several diameters and standard finishes, with cable lengths customizable on request, this project offers flexibility in dimension and colour to suit the architectural scale and design palette.

# PULSATING LED HEART 2010

Suspended in space, the heart seems to breathe: glowing brighter, then softening, never still. The gentle rhythm gives the form an unexpected vitality, as if the room itself had found a pulse. Behind the effect, LEDs fade in and out with precision, transforming a simple contour into a living sign. Intimate yet unmistakable, it creates an atmosphere charged with emotion — poetic in private interiors, iconic in public space.

Each piece is unique as your heartbeat

Available in different sizes and colours, so the gesture can resonate with its architectural setting.

# XXL DOME 1999

A vast dome of light hovers overhead, like a captured piece of sky brought indoors. Its sheer scale astonishes, yet the glow it casts is soft and embracing, turning distance into intimacy and volume into coherence. More sculpture than fixture, it crowns the architecture with an otherworldly calm that cannot be ignored. Colours on request allow the inner world of the dome to shift mood — from quiet resonance to striking contrast — while its presence remains monumental and unmistakably singular.
